Chromes & Negatives

SCANNING SERVICES

We can scan your large originals up to 40" wide, any length and up to a 1/2" thick. Our maximum scan resolution is 600 DPI. These scans are saved as 24 bit color images and are ready for output.

We can also scan your negatives and transparencies at 2400 DPI for output as well as your normal reflective scan requirements.

For higher resolution scanning requirements, drum scanning services are available.

All files are then stored on CD for archival purposes. Customer files are kept for 3 years.

SCANNING SPECIALTIES

We specialize in fine art reproduction. We are able to take your fine art original and scan it direct to provide the highest quality detail. This enables us to reproduce the art work capturing every brush stroke and subtle shade seen in the original.

Scan images may be mounted on a variety of substrates such as:

Foam-Core

Gator Foam

Sintra

and many other rigid substrates

Paintings on canvas must be removed from the frame.

Large Format Services

Customer Satisfaction

Large Format Print Services

We are ready to meet all of your large format output needs up to 60" wide. We offer prints up to 44" wide with archival inks. These prints are guaranteed by the manufacturer for 200 years and when printed on water proof media are suitable for outdoor display.

Both of our large format printers offer high fidelity color printing with a 6 color process.

We offer fast turn around to meet those tight deadlines and provide finishing services to meet your graphic needs and requirements.

Free consulting is available to help you determine the right combination of printing and finishing for a perfect presentation.

Large Format Services

File types we can work with include the following list below. However, this is an ever changing list, so if you are using a format not listed, please call. It may be one we have added or we may be able to provide you with assistance in matching your files with our capabilities.

Adobe Photoshop 6.0
Adobe Illustrator 10
Adobe PageMaker 6.5
Adobe Acrobat 4.0
QuarkXpress 4.01
Corel Draw 10
Freehand 9
Micrografx Designer
Microsoft Publisher
Microsoft Office

We can work with most bitmap formats as well as postscript. We offer these services for both Macintosh and PC

We do ask you to change fonts to outlines on files to help prevent font mismatch issues. It is requested that you send with your file and any linked graphics to prevent low resolution output.

When sending composite art work in Photoshop, it is best if you send the unflattened file when possible. However, if file size prohibits, we can work with the flattened file.

It is recommended that you save your files at final size whenever possible. It is best for the final output to be at least 150 DPI or higher. However, at your request, we will output lower resolution images, but cannot guarantee the quality.

Our normal turn around time is 48 hours. Special situations or job specifications may require more time.

Turn Around of Projects

Satin Photo	Canvas
Gloss Photo	Fine Art Paper
Semi-Gloss Photo	Water Color Paper
Matte Paper	Scrim Vinyl
Adhesive Vinyl	Matte Photo paper
Water Resistant Paper	

Prints are figured to the nearest square foot
All specialty media call for pricing.
